Videography Requirements Checklist

☐ *Flagging tape or blue painter's tape should be used to mark the edge of the ring, in 10 foot intervals, along all four sides of the ring.*

☐ *Video of ring set up, with videographer standing in the center of the ring and slowly panning along each side is required for every test run submission. All obstacles and 10 foot markers must be visible in this set up video.*

☐ *In outdoor venues, it is best to videotape with the sun to the videographer's back.*

☐ *While there is a suggested videographer location on the course map, the videographer does not have to stand inside the ring or in the suggested position.*

☐ *During the test run videographer must pan (follow) the handler and dog, keeping both within the frame of the video camera. It is most important to keep the dog in view of the camera.*

☐ *The DATE & TIME STAMP DISPLAY should be turned on if possible (but it is not required)*

☐ *Video must be taken in a format suitable for upload to YouTube*

☐ *Test video should be named in the following format: Date_Level_DogName (Date should be in the two digit month, day, year format)*

☐ *Video of ring set up should be taken <u>after</u> the test run, immediately following the completion of the test run. .*

☐ *The ring-set up may be a separate video from the test run.*

☐ *The original soundtrack of the video recording must be submitted, and not dubbed or replaced with music.*

☐ *Absolutely no editing should be done of the test run itself. Failure to comply with this rule will disqualify the handler from participating in any future rounds of Virtual Agility League tests.*
